

Making Machines

Product page: <https://hkdaehon.com/category/making-machines/>

Product overview

HK Daehon Machinery Ltd. supplies industrial cigarette and filter machinery. Refer to the product page for media, line layouts, and application notes.

Technical specifications

Parameter	Specification
Range	DH-01, MK8, MK9, P70, CTM-01/01B
Typical integration	Rod maker + filter assembler + packer

Industry cross-check (reference)

Comparable platform class: Cigarette making / tipping lines

- MK8-class makers: industry listings commonly cite ~2,000-2,500 cpm (king size) for rebuilt MK8 platforms.
- High-speed Protos/MK9-class platforms from major OEMs target far higher cpm; HK Mark 9 page cites up to 5,500 cpm - validate on quotation.

Disclaimer

IMPORTANT DISCLAIMER

This brochure is published by HK Daehon Machinery Ltd. for general information only. It is not a binding offer, contract, or warranty.

Specifications are taken from hkdaehon.com as of 04 June 2026 unless noted otherwise. Published data may change without notice.

Industry cross-check notes describe comparable machinery classes in public trade literature (e.g. Hauni/Koerber HLP and Protos lines, GD GDX2-class packers, KDF/ZL filter platforms, and regional OEM rebuilders). Daehon is not affiliated with, endorsed by, or acting for those brands unless expressly stated in writing.

Actual output depends on cigarette format, materials, utilities, ambient conditions, maintenance, and operator training. Only written quotations, signed agreements, and factory acceptance tests are binding.

Verify all speeds, dimensions, and utilities on your project before purchase.
