

Mark 9 Cigarette Maker MK9

Product page: <https://hkdaehon.com/2025/12/31/mark-9-cigarette-maker-high-speed-tobacco-cigarette-making-machine/>

Product overview

HK Daehon Machinery Ltd. supplies industrial cigarette and filter machinery. Refer to the product page for media, line layouts, and application notes.

Technical specifications

Parameter	Specification
Machine speed	4,500 - 5,500 cigarettes/min
Rated capacity	Up to 5,500 cpm (site)
Machine weight	8,730 kg
Compressed air	34 m3/h

Industry cross-check (reference)

Comparable platform class: High-speed maker (MK9 / Protos successor class)

- OEM Protos M8/MK9 platforms are marketed for substantially higher output than MK8.
- HK Mark 9 page cites 4,500-5,500 cpm rated - confirm utilities, air, and format with factory test.

Disclaimer

IMPORTANT DISCLAIMER

This brochure is published by HK Daehon Machinery Ltd. for general information only. It is not a binding offer, contract, or warranty.

Specifications are taken from hkdaehon.com as of 04 June 2026 unless noted otherwise. Published data may change without notice.

Industry cross-check notes describe comparable machinery classes in public trade literature (e.g. Hauni/Koerber HLP and Protos lines, GD GDX2-class packers, KDF/ZL filter platforms, and regional OEM rebuilders). Daehon is not affiliated with, endorsed by, or acting for those brands unless expressly stated in writing.

Actual output depends on cigarette format, materials, utilities, ambient conditions, maintenance, and operator training. Only written quotations, signed agreements, and factory acceptance tests are binding.

Verify all speeds, dimensions, and utilities on your project before purchase.
